

SS/DT

Vertical pneumatic welding machine with hot electrodes for heat sealable bags, with compressed air, with area for lot and date that can be easily updated.

- **Adjustable**
Thanks to the compressed air system it is possible to adjust the strength and the closing time of the sealing bars.
- **Suitable to the medium productions**
For who must include in their production a flexible and precise system that can last longer.
- **Flexible**
It allows to weld easily and quickly various sizes and various materials

Welders for bags

Machine specifications:

Dimension (cm)	45 x 50 x 150
Power (Kw)	0,5 - 220 V
Air pressure (Bar)	10 l / min - 6 Bar
Weight (Kg)	35
