

IG

Injector of antioxidant gases at atmospheric pressure suitable for dome cans containing coffee beans and grained products with capacity from 1 to 3 Kg. The injector can not be used with ground coffee, powders and flours.

Inert gas injector at atmospheric pressure suitable for dome-shaped cans containing coffee beans and granular products with a capacity up to 10 Kg. The machine is not suitable for use with ground coffee, flours and powders.

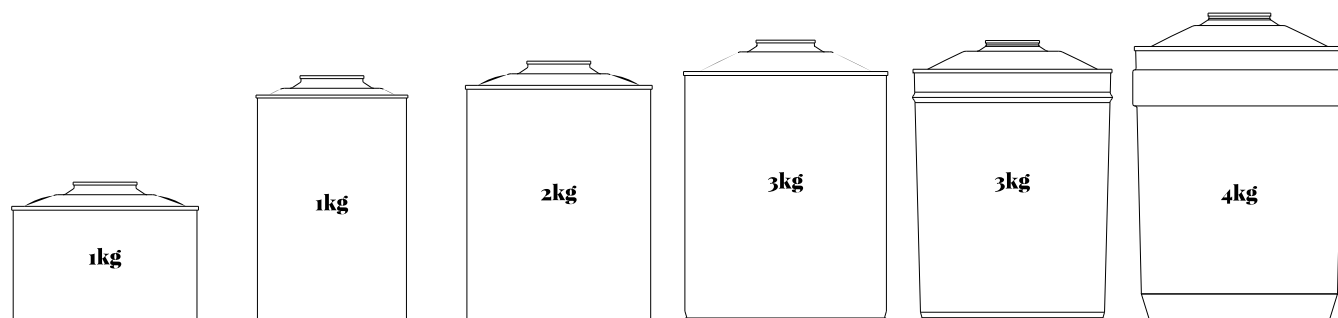

- Economic compromise
The GAS injector IG can work with the seamer AML/P and provide an economic and performing solution.
- Residual value lower than the average
Despite being a manual machine, the IG is able to reach a residual oxygen value of less than 1%.
- Easy and versatile
Besides being easy to use, the IG is very versatile thanks to its intuitive adjustment system, allows you to switch from a capacity of 1 Kg. to 10 Kg. in few seconds.
